# ENDMILLS

## GENERAL PURPOSE FINISHER

### HIGH SPEED STEEL M7

2 Flute - Finishing Endmill  
Primary & Secondary

The 2-Flute HSS Finisher is designed for general purpose applications including: Steels, Cast Materials and Aluminum Alloys. Its design consists of 2 flutes and a 30° helix; features ideal for milling, slotting, plunging and ramping operations.

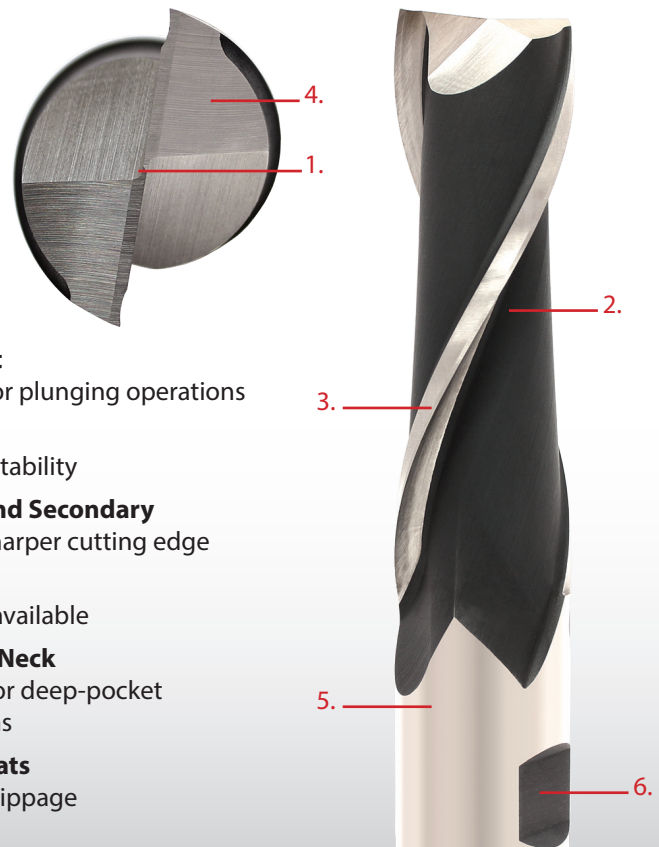

HSS (M7)	2 Flutes	30°
-------------	-------------	-----

#### Benefits:

- Increased chip removal
- Chatter-free machining
- Smooth finish on the part
- High speeds & feeds

#### Applications:

- Steels
- Cast Materials
- Aluminum
- ...and its alloys

- 1. Center Cut**  
Excellent for plunging operations
- 2. 30° Helix**  
Increased stability
- 3. Primary and Secondary**  
Provides sharper cutting edge
- 4. 2 Flute**  
Left-hand available
- 5. Extended Neck**  
Available for deep-pocket applications
- 6. Weldon Flats**  
Reduced Slippage

Proudly Manufactured in the  
United States of America
