

PRECISION CUTTING TOOLS, INC.

ENDMILLS

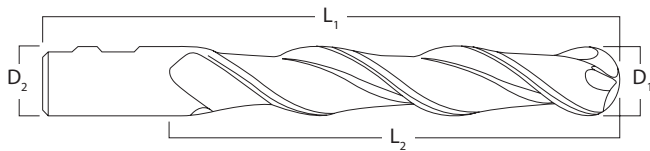

ALUMINUM FINISHER

HIGH SPEED STEEL M7

2 Flute- Finishing Endmill
Primary & Secondary

The 2-Flute HSS Finisher is designed for machining Aluminum applications. Its design consists of 2 flutes and a 37° helix; features ideal for milling, slotting, plunging and ramping operations.

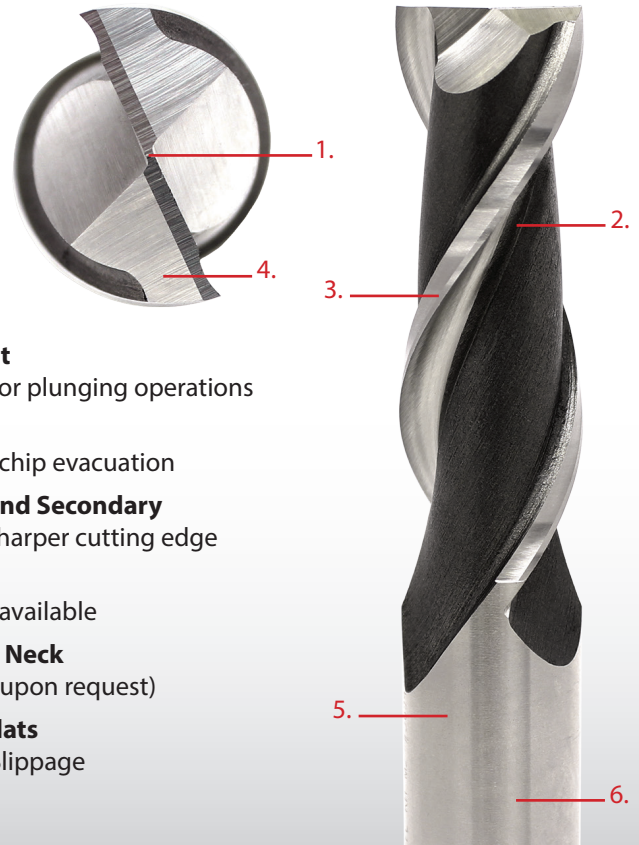

HSS (M7)	2 Flutes	37°
-------------	-------------	-----

Benefits:

- Increased chip removal
- Chatter-free machining
- Smooth finish on the part
- High speeds & feeds

Applications:

- Aluminum
- ...and its alloys

- 1. Center Cut**
Excellent for plunging operations
- 2. 37° Helix**
Improved chip evacuation
- 3. Primary and Secondary**
Provides sharper cutting edge
- 4. 2 Flute**
Left-hand available
- 5. Extended Neck**
(Available upon request)
- 6. Weldon Flats**
Reduced Slippage

Proudly Manufactured in the
United States of America
