

PRECISION CUTTING TOOLS, INC.

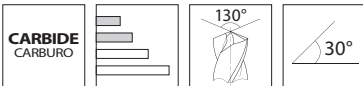

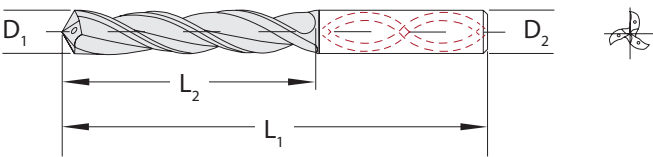

# DRILLS

## HIGH-PERFORMANCE DRILLING

### 3 Flute - Single Margin Carbide Drill High-Performance Drilling

The CXC Series is engineered to provide you with improved accuracy and surface finish. Its design consists of a self-centering point, internal coolant holes, 30° helix and 130° point geometry; a design ideal for Aluminum applications.

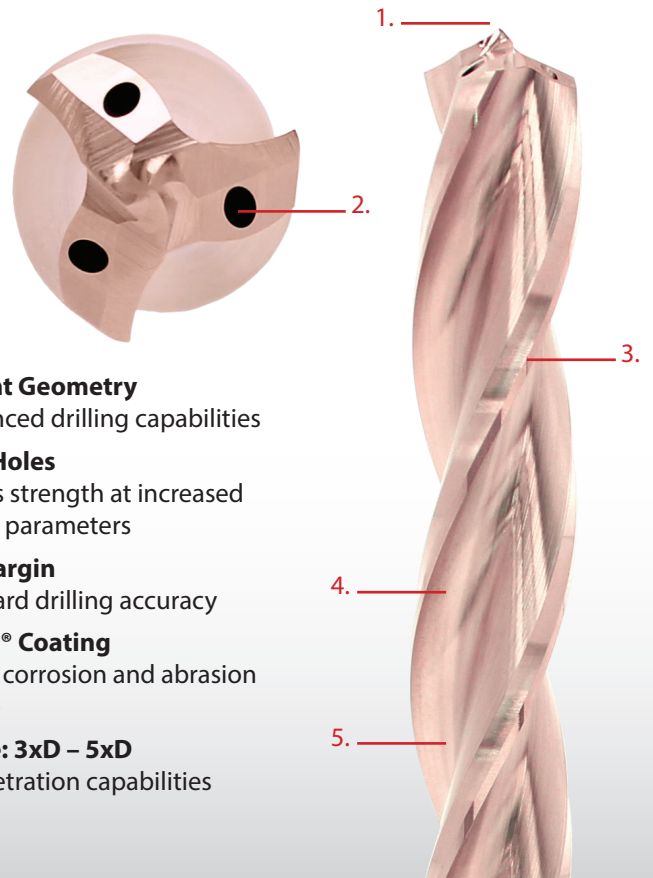

**Zirco Plus®** ZircoPlus® provides increased corrosion and abrasion resistance when machining aluminum and cast materials.

#### Benefits:

- Superior hole quality
- No pecking cycles required
- Increased productivity
- Longer tool life
- Long-term cost savings

#### Applications:

- Aluminum
- Gray Cast Iron
- ...and their alloys

- 1. 130° Point Geometry**  
For advanced drilling capabilities
- 2. Coolant Holes**  
Maintains strength at increased operating parameters
- 3. Single Margin**  
For standard drilling accuracy
- 4. ZircoPlus® Coating**  
Increased corrosion and abrasion resistance
- 5. Available: 3xD – 5xD**  
High penetration capabilities

Proudly Manufactured in the  
**United States of America**
