

PRECISION CUTTING TOOLS, INC.

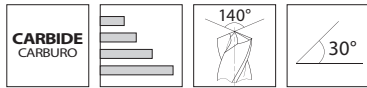

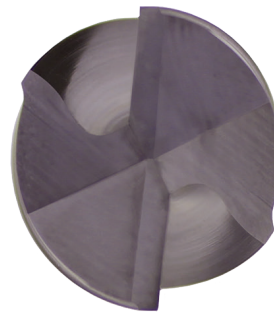

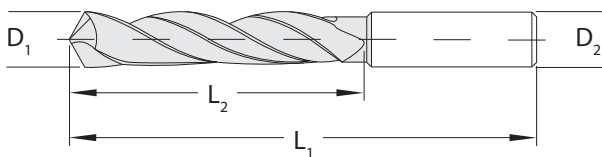

# DRILLS

## HIGH-PERFORMANCE DRILLING

### 2 Flute - Double Margin Carbide Drill High-Performance Drilling

The DX Series is ideal for machining Steels and Cast Materials. Its design consists of a double margin, 30° helix and 140° point geometry; excellent features for high-speed drilling operations.

**Varianta® Supral** provides higher cutting speeds and excellent wear resistance.

#### Benefits:

- Superior hole quality
- No pecking cycles required
- Increased productivity
- Longer tool life
- Long-term cost savings

#### Applications:

- Carbon Steels
- Alloy Steels
- Gray Cast Iron
- Ductile Iron
- ...and their alloys

- 1. 140° Point Geometry**  
For improved accuracy
- 2. Double Margin**  
Improved drilling stability and smooth surface finish.
- 3. Varianta® Supral Coating**  
For wet or dry machining operations of steels
- 4. Available: 3xD - 12xD**  
High penetration capabilities

Proudly Manufactured in the  
**United States of America**
