

PRECISION CUTTING TOOLS, INC.

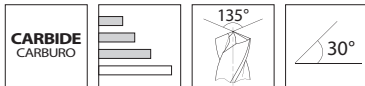

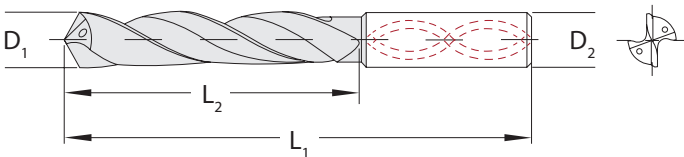

DRILLS

HIGH-PERFORMANCE DRILLING

2 Flute - Single Margin Carbide Drill High-Performance Drilling

The GXC Series is engineered to provide you with improved accuracy at high speed and depths. Its design consists of a single margin, internal coolant holes, 30° helix and 135° point geometry; a design ideal for Stainless Steels, Titanium and Cast Material applications.

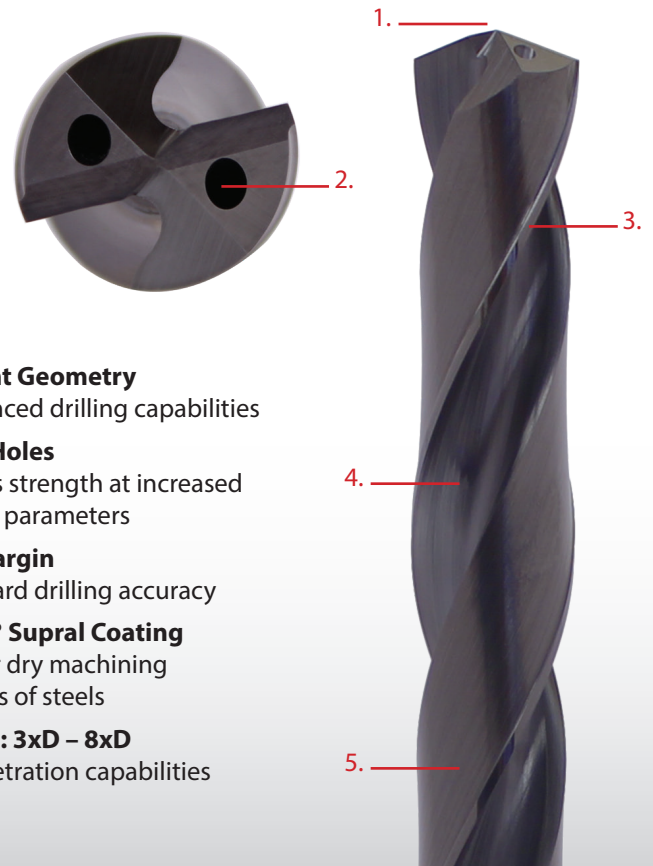

Varianta® Supral provides higher cutting speeds and excellent wear resistance.

Benefits:

- Superior hole quality
- No pecking cycles required
- Increased productivity
- Longer tool life
- Long-term cost savings

Applications:

- Stainless Steels
- Titanium
- Cast Materials
- ...and their alloys

- 1. 135° Point Geometry**
For advanced drilling capabilities
- 2. Coolant Holes**
Maintains strength at increased operating parameters
- 3. Single Margin**
For standard drilling accuracy
- 4. Varianta® Supral Coating**
For wet or dry machining operations of steels
- 5. Available: 3xD – 8xD**
High penetration capabilities

Proudly Manufactured in the
United States of America
