DRILLS

HIGH-PERFORMANCE DRILLING

2 Flute - Single Margin Carbide Drill High-Performance Drilling

The TX Series is a multi-purpose drill designed to machine Aluminum, Stainless Steels, and Heat-Resistant Alloys. Its design includes a 38° helix and 140° point geometry, for improved accuracy and thick-chip removal.

SisNa® is ideal for high-speed machining of hardened steels.

Benefits:	Applications:
<ul style="list-style-type: none"> No pecking cycles required Improved accuracy Thick-chip removal Longer tool life Long-term cost savings 	<ul style="list-style-type: none"> Stainless Steels Heat Resistant Alloys Low-Si Aluminum ...and their alloys

- 140° Point Geometry**
For improved accuracy and thick-chip removal
- Single Margin**
For standard drilling accuracy
- SisNa® Coating**
High-speed applications of hardened steel (>54HRC)
- Available: 3xD - 5xD**
High speeds & feeds

Proudly Manufactured in the
United States of America
