

PRECISION CUTTING TOOLS, INC.

ENDMILLS

GENERAL PURPOSE FINISHER

235 SERIES

2 Flute - Carbide Endmill Primary & Secondary

The 235 Series is designed for general purpose applications including: Steels, Cast Materials and Aluminum Alloys. Its design consists of 2 flutes, a 35° helix and TiCN coating; features ideal for milling, slotting, plunging and ramping operations.

CARBIDE
CARBURO

2
Flutes

35°

TiCN

TiCN features high hardness and a low coefficient of friction; excellent for general purpose machining.

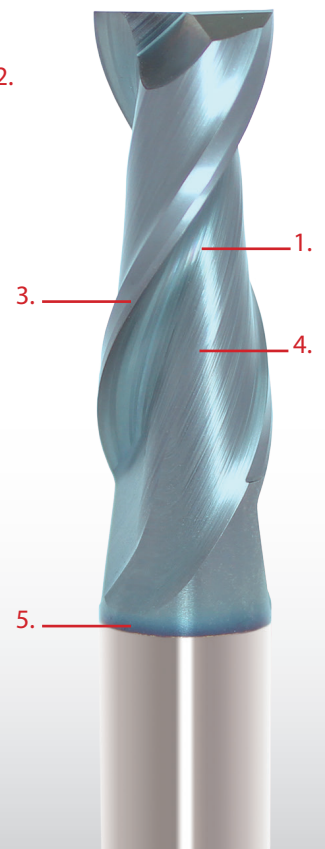

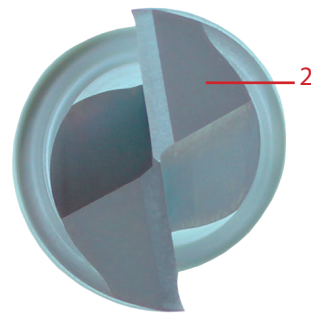

Benefits:

- Increased chip removal
- Chatter-free machining
- Smooth finish on the part
- Reduced friction between the chip & tool
- High speeds & feeds

Applications:

- Aluminum
- Steels
- Cast Metal
- ... and their alloys

- 35° Helix**
Improved chip evacuation
- 2 Flute**
Left-hand
(Available upon request)
- Primary and Secondary**
Provides sharper cutting edge
- TiCN Coating**
High hardness and low coefficient of friction
- Extended Neck**
Available for deep-pocket applications

Proudly Manufactured in the
United States of America
