# ENDMILLS

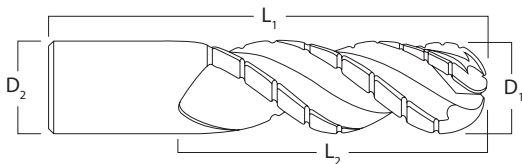

## STANDARD FINISHING ENDMILL

### 339 SERIES

#### 3 Flute - Carbide Endmill Truncated Rougher

The 339 Series - Truncated Rougher is engineered for high-volume metal removal rates. Its design consists of 3 flutes, a 37° helix and truncated teeth; a design ideal for heavy feed rates and deep-pocket applications.

**Z-Power®** Z-Power® has excellent corrosion and adhesion resistant properties.

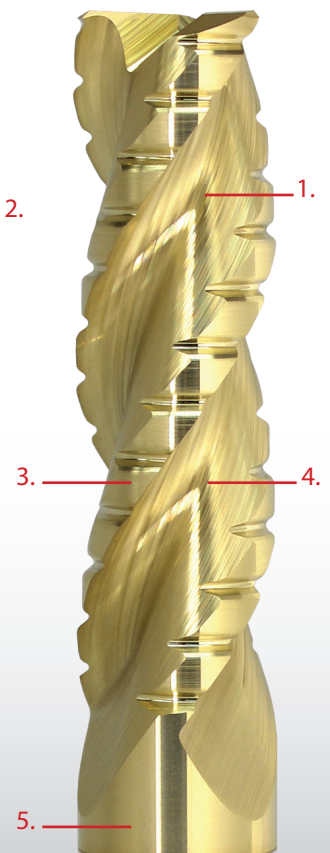

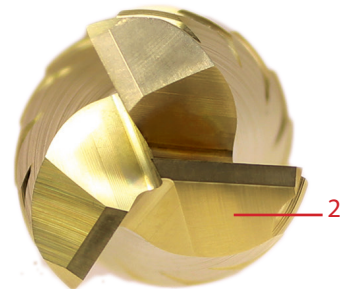

#### Benefits:

- Increased metal removal rates
- Minimized cutting pressure
- Reduced machining time
- Longer tool life
- Long-term cost savings
- Better finish on roughing applications

#### Applications:

- Aluminum
- ...and its alloys

- 37° Helix**  
Improved chip evacuation
- 3 Flute**  
Left-hand  
(Available upon request)
- Truncated Teeth**  
High-volume metal removal
- Z-Power® Coating**  
Reduces friction between the chip & tool
- Extended Neck**  
Available for deep-pocket applications

Proudly Manufactured in the  
**United States of America**
