

PRECISION CUTTING TOOLS, INC.

ENDMILLS

HIGH-PERFORMANCE MILLING

345 SERIES

3 Flute - Carbide Endmill
Primary & Secondary

The 345 Series is engineered specifically for Aluminum applications. Its design consists of primary and secondary angles, a 45° helix and Z-Power® coating; a design ideal for large metal removal rates and a longer tool life.

CARBIDE
CARBURO

3
Flutes

45°

Z-Power® Z-Power® has excellent corrosion and adhesion resistant properties.

Benefits:

- Increased metal removal rates
- Improved accuracy
- Chatter-free machining
- Reduced friction between the chip and tool
- High speeds & feeds

Applications:

- Aluminum
- ...and its alloys

- 1. 45° Helix**
Reduced chatter
- 2. 3 Flute**
Left-Hand
(Available upon request)
- 3. Primary and Secondary**
Provides sharper cutting edge
- 4. Z-Power® Coating**
Reduces friction between the chip and tool.
- 5. Extended Neck**
Available for deep-pocket applications

Proudly Manufactured in the
United States of America
