

PRECISION CUTTING TOOLS, INC.

ENDMILLS

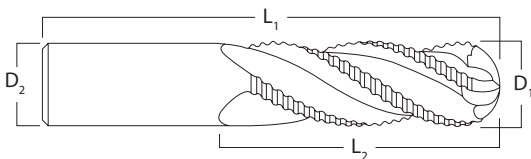

HIGH-PERFORMANCE ROUGHING

429 SERIES

5-7 Flute - Carbide Endmill Coarse Pitch Rougher

The 429 Series is engineered specifically for difficult-to-machine materials. Its design consists of coarse teeth, a 45° helix and Varianta® Supral coating; a design ideal for high-speed operations of hard materials.

Varianta® Supral provides higher cutting speeds and excellent wear resistance.

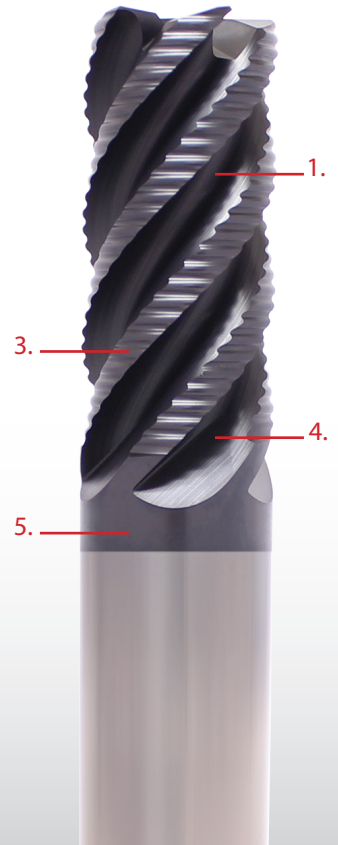

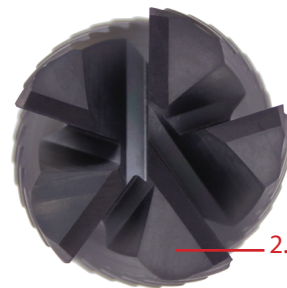

Benefits:

- Increased metal removal rates
- Improved accuracy
- Chatter-free machining
- High speeds & feeds
- Superior surface finish on the part

Applications:

- Titanium
- Stainless Steels
- Carbon Steels
- ...and their alloys

- 1. 45° Helix**
Reduced chatter
- 2. 5-7 Flutes**
Left-hand
(Available upon request)
- 3. Coarse Teeth**
Large metal removal rates
- 4. Varianta® Supral Coating**
For wet or dry machining operations of steels
- 5. Extended Neck**
Available for deep-pocket applications

Proudly Manufactured in the
United States of America
