

PRECISION CUTTING TOOLS, INC.

ENDMILLS

HIGH-PERFORMANCE ENDMILL

781 SERIES

7-14 Flute - Carbide Endmill Eccentric OD

The 781 Series is a high-performance endmill designed for profiling and finishing applications of hard materials. Our 781 Series have a 45° helix and are coated with Varianta® Supral, allowing for both higher chip removal rates and speeds and feeds.

Varianta® Supral provides higher cutting speeds and excellent wear resistance.

Benefits:

- Increased productivity
- Higher speeds & feeds
- Reduced machining time
- Longer tool life
- High finish on the part

Applications:

- Stainless Steels
- Alloy Steels
- High Strength Steels
- Cast Iron
- Titanium
- Hardened Tool Steels
- High Temperature Alloys

- 1. Standard Radius**
For added strength and longer tool life
- 2. 45° Helix**
Reduced chatter
- 3. 7-14 Flutes**
Left-Hand (Available upon request)
- 4. Eccentric OD**
For a tougher cutting edge
- 5. Varianta® Supral Coating**
For wet or dry machining operations of steels
- 6. Extended Neck**
Available for deep-pocket applications

Proudly Manufactured in the
United States of America
