# ENDMILLS

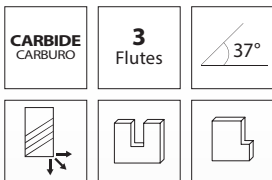

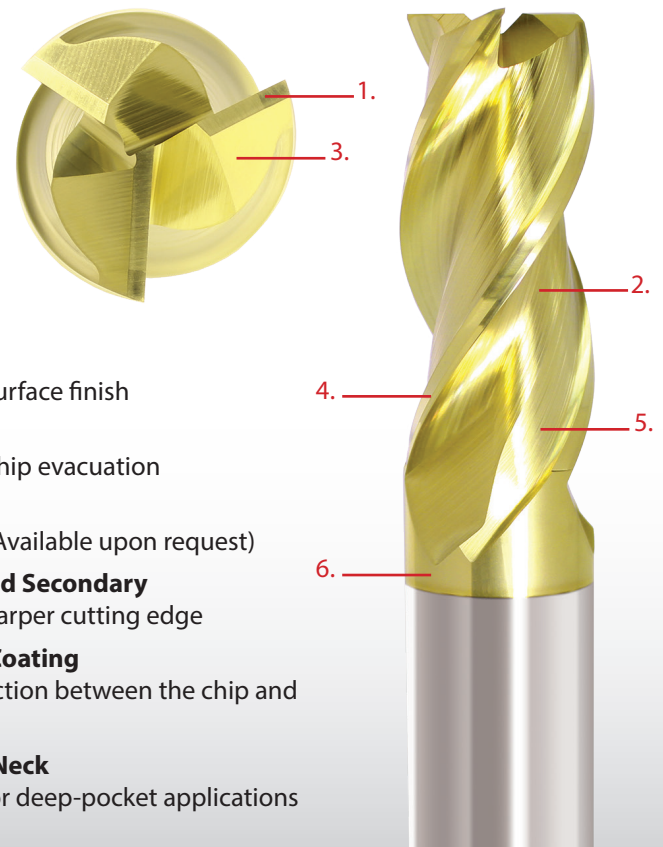

## HIGH-PERFORMANCE MILLING

### W337 SERIES

3 Flute - Carbide Endmill, Wiper Flat on End Face  
Primary & Secondary

The W337 Series is engineered specifically for Aluminum applications. Its design consists of a wiper flat on the end face, a 37° helix; a design ideal for large metal removal rates and a smooth finish on the part.

**Z-Power®** Z-Power® has excellent corrosion and adhesion resistant properties.

Benefits:	Applications:
<ul style="list-style-type: none"> <li>• Increased metal removal rates</li> <li>• Improved accuracy</li> <li>• Chatter-free machining</li> <li>• High speeds &amp; feeds</li> <li>• Superior surface finish on the part</li> </ul>	<ul style="list-style-type: none"> <li>• Aluminum</li> <li>• ... and its alloys</li> </ul>

- 1. Wiper Flat**  
Increased surface finish
- 2. 37° Helix**  
Improved chip evacuation
- 3. 3 Flute**  
Left-hand (Available upon request)
- 4. Primary and Secondary**  
Provides sharper cutting edge
- 5. Z-Power® Coating**  
Reduces friction between the chip and tool
- 6. Extended Neck**  
Available for deep-pocket applications

Proudly Manufactured in the  
**United States of America**
