ENDMILLS

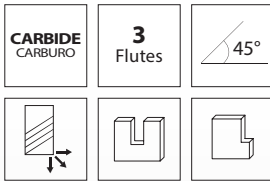

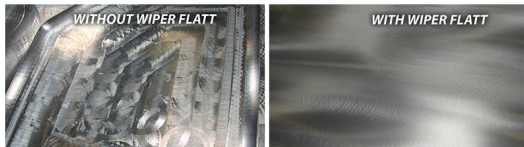

HIGH-PERFORMANCE MILLING

W345 SERIES

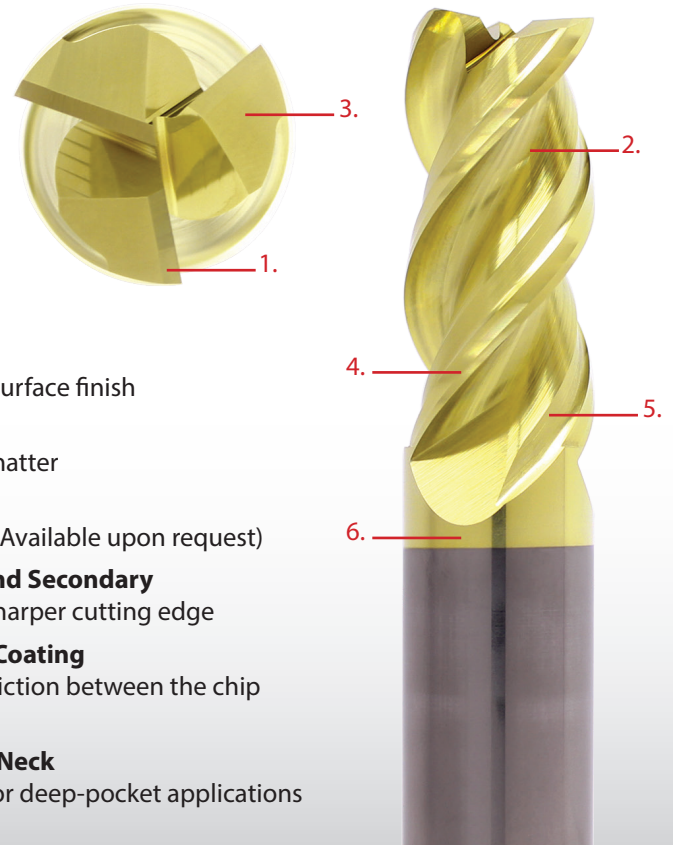

3 Flute - Carbide Endmill, Wiper Flat on End Face
Primary & Secondary

The W345 Series is engineered specifically for Aluminum applications. Its design consists of a wiper flat on the end face, primary and secondary angles, a 45° helix; a design ideal for large metal removal rates and a smooth finish on the part.

Z-Power® Z-Power® has excellent corrosion and adhesion resistant properties.

Benefits:	Applications:
<ul style="list-style-type: none"> • Increased metal removal rates • Improved accuracy • Chatter-free machining • High speeds & feeds • Superior surface finish on the part 	<ul style="list-style-type: none"> • Aluminum • ...and its alloys

- 1. Wiper Flat**
Improved surface finish
- 2. 45° Helix**
Reduced chatter
- 3. 3 Flute**
Left-Hand (Available upon request)
- 4. Primary and Secondary**
Provides sharper cutting edge
- 5. Z-Power® Coating**
Reduces friction between the chip and tool.
- 6. Extended Neck**
Available for deep-pocket applications

Proudly Manufactured in the
United States of America
