

PRECISION CUTTING TOOLS, INC.

ENDMILLS

POWDER METAL FINISHING ENDMILL

POWDER METAL PM4

3 Flute Center Cut Finishing Endmill

Our 3 Flute, Powder Metal Finishing Endmills are designed for machining Aluminum applications. Their geometry includes a 37° helix and Z-Power® coating, for higher speeds and feeds and increased metal removal rates. Furthermore, our Finishing Endmills come with Weldon Flats to reduce tool slippage during machining.

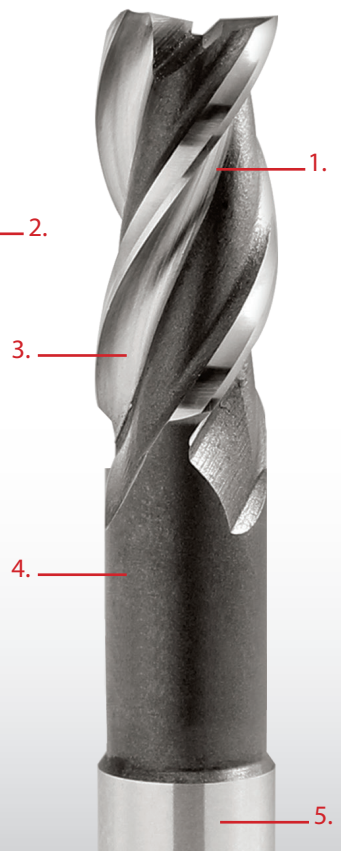

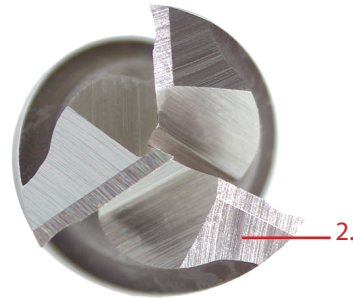

PM4

3
Flutes

37°

Z-Power® Z-Power® has excellent corrosion and adhesion resistant properties.

1. **37° Helix**
Improved chip evacuation
2. **3 Flute**
Left-hand
(Available Upon Request)
3. **Z-Power® Coating**
Reduced friction between the chip and tool
4. **Extended Neck**
Available for deep-pocket applications
5. **Weldon Flats**
Reduced slippage

Benefits:

- Increased metal removal rates
- Reduced slippage
- Higher speeds & feeds
- Reduced heat & abrasion wear
- Longer tool life

Applications:

- Aluminum
- ...and its alloys

Proudly Manufactured in the
United States of America
