

PRECISION CUTTING TOOLS, INC.

ENDMILLS

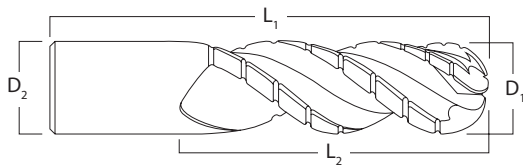

POWDER METAL ROUGHING ENDMILL

POWDER METAL PM4

3 Flute Truncated Roughing Endmill

The Powder Metal (PM4) Truncated Roughing Endmills are engineered for large metal removal rates and efficient chip evacuation. Their design consists of 3 flutes, a 37° helix and truncated teeth; a design ideal for heavy feed rates and deep-pocket applications of Aluminum and its alloys.

PM4	3 Flutes	37°	Truncated Rougher
------------	--------------------	------------	----------------------

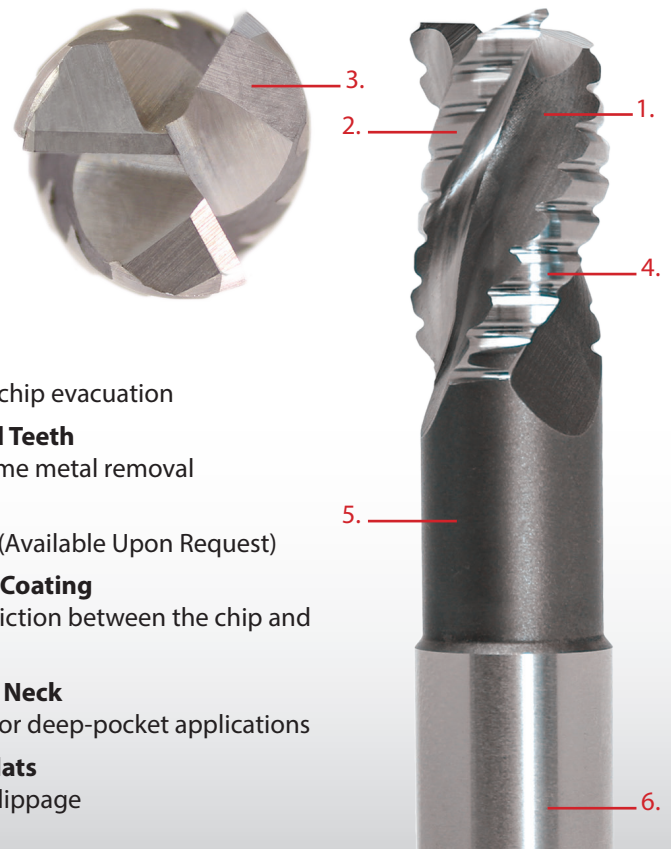

Z-Power® Z-Power® has excellent corrosion and adhesion resistant properties.

Benefits:

- Increased metal removal rates
- Minimized cutting pressure
- Reduced machining time
- Longer tool life
- Long-term cost savings
- Better finish on roughing applications

Applications:

- Aluminum
- ...and its alloys

- 1. 37° Helix**
Improved chip evacuation
- 2. Truncated Teeth**
High-volume metal removal
- 3. 3 Flute**
Left-hand (Available Upon Request)
- 4. Z-Power® Coating**
Reduces friction between the chip and tool
- 5. Extended Neck**
Available for deep-pocket applications
- 6. Weldon Flats**
Reduced slippage

Proudly Manufactured in the
United States of America
